# FEW THINGS ON

The popular song, "Bring Back Those Wonderful Days," was the topid of considerable discussion at the Union depot today when tourists from the east arrived in Ogden on westbound train 12.

"Oh. Boy! The Twentieth Century sure am some speed bail." remarked one of the dining car

"Speed, say the railroads surety know the mexning of tifat word," replied a demure Miss.

"Yes, and that isn't haif of it." exclaimed an elderly lady. "In-

creasing the speed on the various roads of the country is but a mere trifle compared to the other increases which have resulted since August 26. In the olden days one could eat a perfectly good meal on the diner at a reasonable figure, but now—good gracious—if requires a fortune to get by "Lunches are being packed by hundreds since the new rates went into offect, especially since the increases have been adopted on the diners. Coffee which sold for twenty cents per pot before August 26 now sells for thirty cents, and other entables have advanced from twenty-five to forty per cent.

"Tis no wonder the tourists are singing this refrain, "Bring Back Those Wonderful Days."

## Dr. Conroy Praised as Fuel Director

Fuel problems in Weber county during 1917 and 1918 and the work of Dr. E. M. Conroy, fuel administrator for the county, are to have a place in Utah's war history, according to word received from Salt Lake During ine two years Dr. Conroy furnished much information regarding fuel problems, which are considered of high histori-cal value, according to Dr. A. L. Neff.

cal value, according to Dr. A. L. Nell, state war historian.

The information shows that the fuel supply of San Juan county is 100 percent wood. For that reason O. W. McConkle, who was wartime fuel administer for that county, reports the troubles over its fuel supply were minus and the office of county fuel administrator was largely "honorary."

Ted Conroy of Ogden Among Democrat's Presidential Nom-Utahns Aspiring for British Scholarship

chairman of the Cache county committee, was appointed by H. L. Mulliner, sented by five men.—Ralph E. Lewis, A. F. Shafisky and W. J. Cope of Salt Lake; Hugh A. Wing of Mapleton and Thomas J. Parmley of Sandy.

The Utah Agricultural college has six men in the race.—K. B. Sauls, J. M. Christensen, J. Clyde Worley and George Hansen of Logan; J. H. Clawson of Providence and Scott Ewing of Smithfield. Paul E. Davies. Salt Lake, a graduate of Princeton, is also entered in the competition.

These young men have been selected by their respective colleges because of the high standards of scholarship, leadership and character aftained and manifested by them during their school careers. Several of them have served as presidents of their student body organizations, at the same time maintaining excellent class records. So the warning sent out to the various states by the American secretary of the Rhodes trustees not to make a selection unless a really worthy candidate presents himself is entirely unnecessary in the case of Utah, as anyone of a half score of the candidates would reflect very distinct credit and honor on his college and his state, according to the committee of investigation here.

Christian R. Garver, pastor of the First Methodist church of this city was re-appointed for the coming year

The competition itself does not include any examination, but the successful candidate may be required to pass an examination in Latin and mathematics after reaching Oxford. He is then at liberty to pursue any course of study along literary scientific or professional lines, leading to a degree at the end of the three years for which the scholarship is good. The value of the scholarship is 300 pounds sterling, or nearly \$1500 a year, but even this liberal pursue is scarcely sufficient since the war to meet all expenses, including those for the extensive traveling which Rhodes scholars are expected to do

The state committee of selection consists of Dr. John A. Widtsoe, chairman, M. D. Thomas, B. H. Jacobson, secretary, and F. E. Holman. This year two appointments will be made for Utah and the results in each state will be published simultaneously on light at which weather recognition night at which weather recognition night at which weather recognition
